The screenshot shows the Skatteverket website interface. At the top, there is a navigation bar with the Skatteverket logo on the left and links for 'Teckenspråk', 'Other languages', 'Kontakta oss', and 'Logga in' on the right. Below this is a search bar and a yellow navigation bar with tabs for 'Privat', 'Företag', 'API:er och öppna data', and 'Om oss'. Under the 'Privat' tab, there are links for 'Deklaration', 'Skatter', 'Folkbokföring', 'Fastigheter och bostad', and 'E-tjänster och blanketter'. A red callout box with the text 'Init login' points to the 'Logga in' button. The main content area features a large heading 'Få deklARATIONEN tidigare' (Get the declaration earlier) and a subtext 'Skaffa digital brevlåda senast den 25 februari. Då får du inkomstdeklARATIONEN digitalt i början av mars.' (Get digital mailbox no later than February 25. Then you will get the income declaration digitally in early March). Below this is a yellow button labeled 'Deklaration' with a right arrow. To the right of the text is an illustration of a smartphone displaying a mailbox icon, with a blue and white penguin character standing next to it. At the bottom, there are three white buttons: 'Med anledning av corona', 'Bostadsuppskov', and 'Anmäl ny adress'.

# PersonIdentifier format

theory

- **Three fields separated by "/"**
  - Citizen country code (ISO 3166-1 alpha-2)
  - Service provider country code (ISO 3166-1 alpha-2)
  - Alphanumeric string

**SE/IT/198611062384**

**BE/IT/1Ydnvv8thVHtXFmzOWTmcWhWjuojyLipJtc2Cu7**

# spidCode format

theory

- **Two fields without separator**

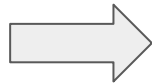

- identity provider identifier (4 chars)
- credential identifier (10 digits)

**AIDP0001007562**

- **When it comes from eIDAS login**

- PersonIdentifier format

**SE/IT/198611062384**

# Compare LoA as eIDAS likes

Action 3

- Request the “minimum” comparison for LoA

 RequestedAuthnContext.xml

Raw

```
1 <saml2p:RequestedAuthnContext Comparison="minimum">
2   <saml2:AuthnContextClassRef>https://www.spid.gov.it/SpidL2</saml2:AuthnContextClassRef>
3 </saml2p:RequestedAuthnContext>
```

# Be ready to manage eIDAS responses

Action 4

- **Able to manage all the EU charsets**
  - ISO-8859-2 (eastern Europe)
  - ISO-8859-7 (greek alphabet)
- **Able to manage “both” the spidCode formats**
  - SPID format (AIDP0001007562)
  - eIDAS format (SE/IT/198611062384)
- **Able to manage empty/null responses for optional attributes**
  - Attribute with empty/null value
  - Attribute not included in the response

**AGID**

The Agency for  
Digital Italy

# Be ready to manage eIDAS responses

Action 4

- **Able to manage multiple “spidCode” for the same user**
  - If the Member State notified more than one eID scheme
  - FYI, an Italian citizen can be recognised with **ten different “unique” personIdentifier**
    - Nine (9) SPID identity providers
    - Carta d'Identità Elettronica

**AGID**

The Agency for  
Digital Italy

# What about Codice Fiscale?

- eIDAS can't manage it
- If really needed, it's in charge of the service provider
- Valid for any other attribute not managed by eIDAS

**AGID**

The Agency for  
Digital Italy

# Obtaining Codice Fiscale (proposal 1)

- **During the first login...**
  - Make an eIDAS authentication
  - Obtain Codice Fiscale in the form of self-declaration
  - If needed, verify Codice Fiscale in the back-office
- **During the following logins...**
  - Make the eIDAS authentication
  - Codice Fiscale already present in the user profile

**AGID**

The Agency for  
Digital Italy

# Obtaining Codice Fiscale (proposal 2)

- **During the first login...**
  - Make an eIDAS authentication
  - Assign a “fake” Codice Fiscale (e.g. generated from eIDAS attributes)
- **During following logins...**
  - Make the eIDAS authentication
  - Codice Fiscale already present in the user profile

**AGID**

The Agency for  
Digital Italy
