GARR Conference  
30 Nov.-2 Dec., Firenze

# The i-Treasures project

**Looks at a number of rare and valuable living expressions and traditions**

**Proposes novel methodologies and new technological paradigms for the analysis and modelling of these ICHs**

## Capturing

## ICH Analysis & Modelling

## Multimodal Data Fusion & Semantic Media Interpretation

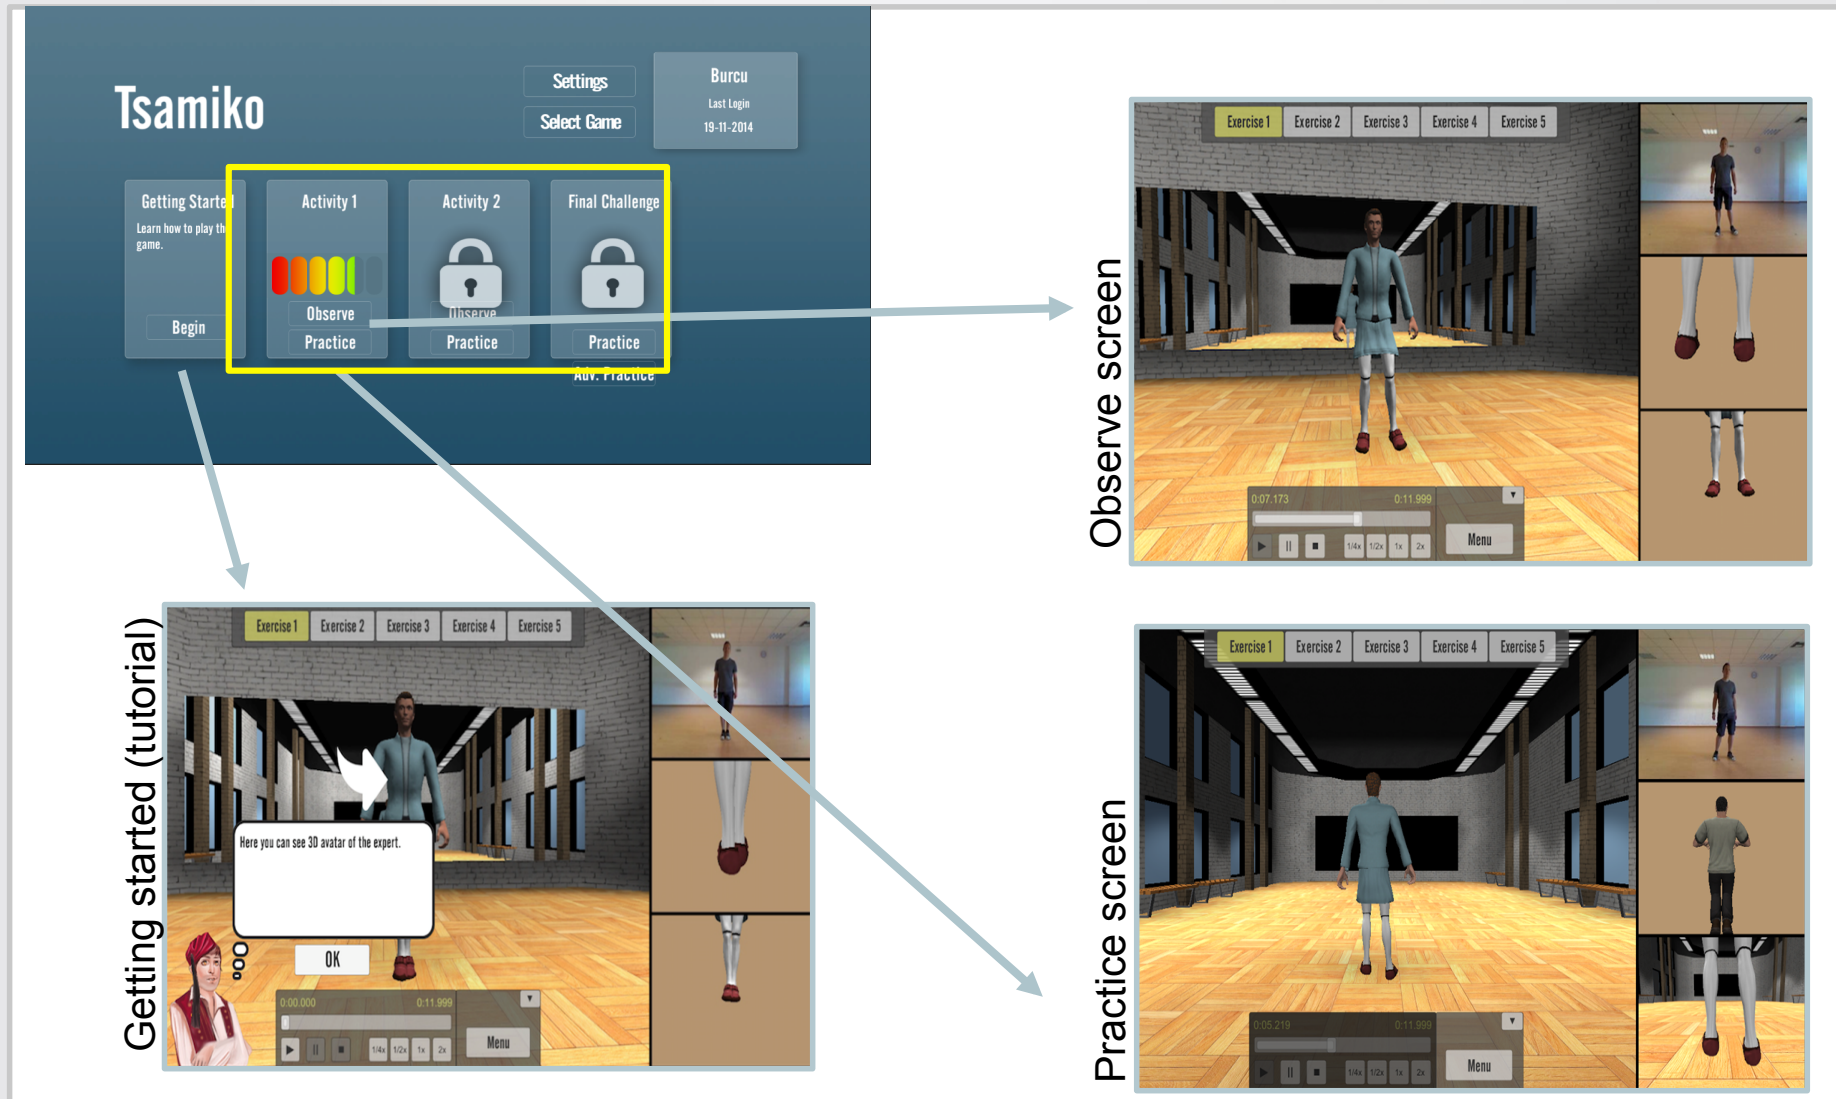

## ICH models

- Have the  
ultimate aim of:**
- ✓ **Safeguarding**
  - ✓ **Disseminating**
  - ✓ **Supporting innovative  
learning approaches**

by developing “*an open and extendable platform providing access to ICH resources enabling knowledge exchange between researchers and contributing to the transmission of rare know-how from Living Human Treasures to apprentices*”

# The 3D applications

# Conclusions

---

- Through its platform, the i- Treasures project has the scope to widen the access to ICH education making the most of the opportunities offered by technologies for supporting the passing-down of specific know-how.
- This effort resulted in innovative learning paths and tools (among which the 3D applications) that are made available in a dedicated area of the platform.
- These tools and the “training initiatives” in which they are inserted are not intended to - and cannot in any way - replace the traditional way in which an ICH expression is ‘naturally’ learnt.
