From online training on Open Science to the design and delivery of Open Educational Resources

An example of FAIR-ification of digital training resources

TRIPLE Open Science Training Series

- Need for **increased skills in Open Science practices** and workflows
- Need to build a **shared understanding** of the latest European Open Science advancements
- Need to establish **common practices** in managing FAIR training materials

Challenges in achieving FAIR-by-design: The example of the TRIPLE Open Science Training Series

February 25, 2022

TRIPLE Training Toolkit

Francesca Di Donato, Lottie Provost, Tiziana Lombardo, Michela Vignoli, Stefano Pohle, Erzsebet Toth-Czifra, Yin Chen, Emilie Biondine

The TRIPLE Training Toolkit is part of the work performed by Work Package 6 (WP6) under Task 6.3 in the TRIPLE Project (Transforming Research through Linked Interdisciplinary Exploration). The project is funded by the European Commission, under Grant Agreement No. 863420 and will run for 42 months starting from October 2019.

The TRIPLE Open Science Training Series focuses on the design and delivery of competence-oriented training to address the specific and general needs of the research community on Open Science topics and on the EOSC.

The experiment enabled a reflection on the current challenges to make FAIR by design training resources and how to overcome them.

The following files are deposited in Zenodo to serve as a reference for those wishing to reproduce this experiment within their own institution or for their own training activities.

Please note that the training series are still ongoing and as such the present document and the files listed below will be followed by updated versions by the end of the project (2022).

The first document to read is the README.
